The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-16 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Miyasaka and Bhat.

The rejection is maintained as stated in the paper mailed 2/28/03 and as follows.

It would have been within the scope of one of ordinary skill in the art to omit annealing in the event that the effects of the step are not desired. The process of the combination does not appear to include an annealing step.

Applicant's argument regarding lack of disclosure of transistor formation is not persuasive because the pointed to limitation appears in the preamble and is therefor not accorded patentable weight. MPEP 2111.02.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory
